Reliable conveyance at inclines of up to 90°: Continental Belting [®] high-incline

Continental Belting, Mumbai, India

With over 500 installations in India & Abroad, using Continental Belting Sidewall Belts, we have exposure to a wide variety of industries, such as sponge iron, foundries, ready-mix concrete, glass, coke, power, fertilser etc., to name but a few. The specialist high fatigue resistant glass fibre, steel weave crossstablised base belt has a state-of-the-art world-class technology without peers! Sidewalls & cleats, together, form an indefatigable foil to the above mentioned base belt

The concept

ContinentalBelting[®] corrugated side-wall belts for transport of bulk goods offer high-quality high-incline long term conveyance solutions. Depending on the application area, customers can pick from three corrugated sidewall types and four cleat types in configuring individual belts. The belts can, for example, also be configured with three corrugated sidewalls, making for a "double" conveyor system on just one belt. In this case, two different bulk materials can be simultaneously transported on

Benefits

- Saves space, since conveyance at inclines of up to 90° is possible
- Material conveyed is protected
- Extremely high stability is provided in the traverse direction, good longitudinal flexibility
- Different feed and discharge directions are possible by rotating the vertical runs

Proven in diverse applications

- Construction industry
- o Potash and salt mining
- o Stones and earth, ready-mix-concrete
- o Fertilisers & coke
- o Chemical industry
- o Recycling industry
- o Sponge Iron.
- Foundries ... and many more!
